Hip Resurfacing

A Remarkable New Alternative to Total Hip Replacement Surgery

If you've been told you need total hip replacement surgery, you may qualify to be one of the first recipients of a hip resurfacing procedure in the United States.

This long-awaited hip surgery breakthrough:

- Preserves more of your body's natural bone structure and stability than total hip replacement
- Uses the tough, low-friction BIRMINGHAM HIP™ resurfacing implant
- Has the potential to return you to more physical activity than total hip replacement

Physician Referrals Welcome. Direct Appointments Available.

Dr. Tom E. Knox

Board Certified Surgeon (ABOS),
Arthroscopy Association of America - member,
Committed to continuing medical education.
