

It's time to end carpal tunnel pain...

...and the orthopaedic surgeons at Knox Orthopaedics can make that happen. Using the traditional approach, or even the newer endoscopic-assisted procedure, they can relieve the pressure on your median nerve that causes the pain, tingling and numbness of carpal tunnel syndrome. This procedure can be done quickly in an outpatient setting, such as our Mountain Home Surgery Center, and will make your annoying carpal tunnel symptoms a thing of the past.

Schedule your appointment with one of our orthopaedic surgeons today by calling 800-621-3218.

#3 Medical Plaza • Mountain Home, Arkansas 72653
